

## EYE-4-SPLIT

STAND ALONE DISPLAY WALL CONTROLLER

### ) PRODUCT DESCRIPTION

**The eyevis EYE-4-SPLIT is a stand alone display wall controller that accepts a standard single or dual-link DVI input and can flexibly display this across four output monitors.**

Each output can be driven as DVI or analog RGB, and can represent an arbitrary crop region of the original input image. The output resolution and frame rate does not need to be related to that of the input as the eyevis EYE-4-SPLIT will optionally upscale and frame-rate convert each cropped region independently. Additionally, each output can be independently mirrored or rotated through 90°, 180° or 270° to support creative mixes of landscape and portrait monitors.

At high resolution, DVI signals cannot normally be guaranteed beyond 5m cables due to the nature of the signal losses inherent in the DVI cables and connectors. eyevis have added active equalization hardware on the EYE-4-SPLIT which is able to compensate for these losses and support cable lengths of up to 20m even at full dual-link resolutions (330Mhz pixel clocks). Lower resolutions will allow even longer cable lengths.

### ) FEATURES

- Supports full bezel width and height correction for all types of displays
- Ideal for use with edge blending projectors – supports image overlapping.
- Splits a single DVI input into four independent monitor outputs.
- Accepts Dual Link DVI, Single Link DVI or HDMI input. (\*HDMI input requires the optional DVI/HDMI Adapter)
- The input EDID is programmable to allow arbitrary input resolutions and frame rates.
- Flexibly drives four displays, each from any selected region of the input image.
- Supports both DVI and analog RGB output monitors.
- Stand alone operation supports auto-detecting of input resolution and output monitor native resolutions. Output screen configuration is defined by internal non-volatile memory.
- Output configuration is programmable via a USB connection to a PC. Graphical utility allows easy control of cropping, scaling, rotation and gaps
- Active equalization hardware for longer cable support up to 20m for full Dual Link, for more flexible positioning.

### ) ADVANCED FEATURES

#### SUPPORTS CREATIVE MONITOR ARRANGEMENTS

Each output monitor can take its input from any region of the input DVI image, since all the required cropping, scaling, rotation and frame-rate conversion is handled by the EYE-4-SPLIT hardware. These regions can overlap to allow any output to replicate another, or they can be configured to support any creative splice of the source material. This allows the support of many non-rectangular screen arrangements with uneven gaps, and any mix of monitor orientations.

#### DUAL-LINK DVI INPUT SUPPORTS HIGH RESOLUTIONS

Dual-Link DVI input will support high resolution pixel-perfect source images for display. The eyevis EYE-4-SPLIT can additionally present a default native resolution to the source to allow still higher custom resolutions at reduced frame rate, but still remain within the capabilities of the Dual-Link interface. Most standard graphics card sources will output at this native resolution. Since the EYE-4-SPLIT will scale and frame-rate convert, using a triple-buffered capture architecture, the output monitors can still be driven at their preferred frame rates and resolutions.

#### SIMPLE CONFIGURATION

The EYE-4-SPLIT supports simple editing of custom input and output configurations via a USB connection to a PC.

Once configured, the EYE-4-SPLIT will run stand-alone, without the need for the USB connection, and will auto detect input resolutions and adjust internal scaling appropriately to drive the output monitors in a consistent manner.

#### GENLOCK

The eyevis EYE-4-SPLIT will auto-sense input and output frame rates and automatically genlock when possible. Four identical output monitors will automatically be driven genlocked and if the input timings match they are additionally genlocked and clock-locked to the source signal.

## EYE-4-SPLIT

STAND ALONE DISPLAY WALL CONTROLLER

### ) TECHNICAL SPECIFICATIONS

Dimensions:	235 × 175 × 44mm / 9.25" × 6.9" × 1.75"
Operating Temperature Range	0 - 35 °C / 32 - 96 °F
Power Requirements	5V DC, 18W. Universal mains power adapter supplied (100-240V)
USB 2.0:	Full speed (12Mbits/s) operation supported
Cooling:	Internal fan
Input:	1× DVI Dual Link, max. 4K × 4K with up to 330 Megapixel/s
Outputs	4× DVI Single Link, max. 2048 × 2048 with up to 2.5 Megapixel
Arbitrary Up Scaling:	64× original surface area
MTBF:	50,000 hrs

### ) CREATIVE EXAMPLE CONFIGURATIONS

„Display Windmill“

„Display Wheel“
